

# A New Smile in Just 72 Hours? Discover the Revolutionary Approach of 72 Hours Smile Care Center

Imagine walking into a dental clinic with a set of missing teeth, gum issues, or a smile you're not entirely comfortable with. Now, imagine walking out of that clinic just 72 hours later with a new, confident smile—something that once seemed like a far-off dream, made possible in just a few days. This transformative experience is what the 72 Hours Smile Care Center, a multi-specialty clinic in Pune, promises to offer its patients.

Built on the premise of providing quick, comprehensive dental care, 72 Hours Smile Care Center delivers a variety of treatments that once took weeks or months to complete, all within a matter of just three days. With an impressive array of dental services under one roof, the clinic is rapidly making a name for itself as a leader in modern, efficient dentistry.

## Comprehensive Dental Care Under One Roof

While the clinic's name reflects its core premise of completing treatments in 72 hours, it's important to note that 72 Hours Smile Care Center offers far more than just speed. It's a fully-equipped, multi-specialty dental clinic of specialists, where nearly every type of dental treatment is available, including:

**Dental Implants** – Offering permanent teeth with the innovative Basal Implantology technique.

**Orthodontics and Orthognathic** – Providing traditional braces and for teeth straightening & jaw alignment in severe cases.

**Root Canal Treatment** – Saving teeth with precision and speed.

**Crowns and Veneers** – Cosmetic solutions to enhance the aesthetics of the teeth.

**Dental Restoration** – Filling cavities and repairing damaged teeth.

**Dental Extractions** – Safe and efficient removal of teeth when necessary.

**Invisalign Treatment** – A clear, removable, and discreet option for teeth alignment.

**Teeth Cleaning** – Regular professional cleaning to maintain oral hygiene.

**Dr. Laxman Malkunje**

BDS, MDS Oral & Maxillofacial Surgery

**Director** : 72hrs Smile Care Centre, Pune

**Consultant**: Deccan Hardikar Hospital, Pune

**IF Teacher** : Munich, Germany

**Pediatric Dentistry** – Specialised care for children's dental needs.

**Oral and Maxillofacial Surgery** – Handling complex issues like facial trauma and wisdom tooth extractions.

What makes this clinic truly stand out is its ability to complete nearly all of these treatments in just 72 hours. Whether it's fixing missing teeth or undergoing a smile makeover, patients at 72 Hours Smile Care Center can expect to walk out with a renewed sense of confidence in a fraction of the time they might have anticipated.

## The Revolutionary Basal Implantology

One of the clinic's key specialties is Basal Implantology, a groundbreaking approach to dental implants. This technique has become a game-changer for those who need fixed teeth but may not have sufficient bone structure to support traditional implants. With basal implants, which anchor into the stronger, denser bone at the base of the jaw, patients can get permanent, fixed teeth within 72 hours—a procedure that normally takes months to complete.

Basal implants are particularly beneficial for patients who have been told they're not candidates for traditional implants due to bone loss or other complications. This treatment allows for immediate loading, meaning patients don't have to wait for months to get their final set of teeth; the entire process can be completed in just three days.

The mastermind behind this rapid advancement in dental care is Dr. Laxman Malkunje, an Oral and Maxillofacial Surgeon and one of the pioneers of basal implantology in India. Dr. Malkunje has been at the forefront of this technology, having received certification in Immediate Functional Loading Implantology from Munich, Germany. Over the years, he has helped countless patients restore their smiles quickly, safely, and effectively.

## Expanding Across India

While 72 Hours Smile Care Center currently operates three clinics in Pune, Dr. Malkunje has a vision to expand this model across India. His goal is to

make these advanced, rapid treatments accessible to patients in cities across the country. With hundreds of success stories already under his belt, Dr. Malkunje believes that this approach could revolutionise the way dental care is delivered in India, helping people get faster, more effective treatments without compromising on quality.

## A Family-Friendly Clinic

The clinic's appeal doesn't end with cutting-edge technology. There is a strong emphasis on creating a family-friendly atmosphere, where patients of all ages can feel comfortable. Whether it's a child's first visit to the dentist or an elderly patient looking for a new set of teeth, 72 Hours Smile Care Center is designed to cater to the needs of the entire family.

Dr. Malkunje and his team focus not only on the technical aspects of dental care but also on patient education and communication. This patient-first approach is what makes the clinic stand out—patients know that they're in safe hands, whether they're undergoing a simple cleaning or a complex oral surgery.

## Common Concerns and Questions

For many patients, the idea of getting major dental treatments in just 72 hours can seem daunting. After all, dental work is often associated with long waiting periods, multiple visits, and uncomfortable procedures. To help address these concerns, here are some common questions and answers related to the clinic's services:

### Can I really get new teeth in 72 hours?

Yes, with advanced treatments like Basal Implantology, patients can receive fixed, permanent teeth in just 72 hours. The process involves placing implants and attaching prosthetic teeth all within three days, making it ideal for those who want quick, effective solutions.

### Is it safe for patients with medical conditions like diabetes or heart disease?

Basal implants can often be placed in patients who have medical conditions that might prevent traditional implants. The clinic ensures that a thorough evaluation is conducted before any procedure to ensure the safety and suitability of each patient.

### What if I don't live in Pune? Can I still get treatment?

Many patients travel from other cities and even countries to receive treatment at 72 Hours Smile Care Center. The clinic coordinates the entire process, ensuring that patients can complete their treatment in just 72 hours, making it convenient for those who don't live locally.

### What are my options for a smile makeover?

Smile makeovers can include a variety of treatments, such as dental implants, crowns, veneers, and orthodontics. The team at 72 Hours Smile Care Center creates customised plans to give patients the best possible smile, tailored to their unique needs.

### At what age should a child have their first dental visit?

It's recommended that children have their first dental check-up by their first birthday or when their first tooth appears. Early visits help establish a positive relationship with dental care and allow for early detection of any potential issues.

### Why 72 Hours Smile Care Center Stands Out?

In an era where efficiency and quality are often seen as opposing forces, 72 Hours Smile Care Center manages to combine both. With its focus on rapid, high-quality treatments, it's no wonder that the clinic is gaining a reputation for being one of the leading dental care providers in Pune.

While quick service is important, the clinic's success lies in its balance of speed and expertise. Patients leave not only with their dental issues resolved but also with the knowledge that their health and comfort were prioritised every step of the way.

As Dr. Malkunje continues to expand his vision, 72 Hours Smile Care Center is set to become a household name in the field of dentistry across India. With a strong commitment to innovative treatments and patient care, the clinic is redefining what it means to receive modern dental care in today's fast-paced world.
